[75 FR 23184, May 3, 2010]

Subpart B—Servicing of Motor Vehicle Air Conditioners

Source: 57 FR 31261, July 14, 1992, unless otherwise noted.

§82.30 Purpose and scope.

- (a) The purpose of the regulations in this subpart B is to implement section 609 of the Clean Air Act, as amended (Act) regarding the servicing of motor vehicle air conditioners (MVACs), and to implement section 608 of the Act regarding certain servicing, maintenance, repair and disposal of air conditioners in MVACs and MVAC-like appliances (as that term is defined in 40 CFR 82.152).
- (b) These regulations apply to any person performing service on a motor vehicle for consideration when this service involves the refrigerant in the motor vehicle air conditioner.

 $[57~\mathrm{FR}~31261,~\mathrm{July}~14,~1992,~\mathrm{as}~\mathrm{amended}~\mathrm{at}~62~\mathrm{FR}~68046,~\mathrm{Dec.}~30,~1997]$

§82.32 Definitions.

- (a) Approved independent standards testing organization means any organization which has applied for and received approval from the Administrator pursuant to §82.38.
- (b) Approved refrigerant recycling equipment means equipment certified by the Administrator or an organization approved under §82.38 as meeting either one of the standards in §82.36. Such equipment extracts and recycles refrigerant or extracts refrigerant for recycling on-site or reclamation offsite.
- (c) Motor vehicle as used in this subpart means any vehicle which is selfpropelled and designed for transporting persons or property on a street or highway, including but not limited to passenger cars, light duty vehicles, and heavy duty vehicles. This definition does not include a vehicle where final assembly of the vehicle has not been completed by the original equipment manufacturer.
- (d) Motor vehicle air conditioners means mechanical vapor compression refrigeration equipment used to cool

the driver's or passenger's compartment of any motor vehicle. This definition is not intended to encompass the hermetically sealed refrigeration systems used on motor vehicles for refrigerated cargo and the air conditioning systems on passenger buses using HCFC-22 refrigerant.

- (e) Properly using. (1) Properly using means using equipment in conformity with the regulations set forth in this subpart, including but not limited to the prohibitions and required practices set forth in §82.34, and the recommended service procedures and practices for the containment of refrigerant set forth in appendices A, B, C, D, E, and F of this subpart, as applicable. In addition, this term includes operating the equipment in accordance with the manufacturer's guide to operation and maintenance and using the equipment only for the controlled substance for which the machine is designed. For equipment that extracts and recycles refrigerant, properly using also means to recycle refrigerant before it is returned to a motor vehicle air conditioner or MVAC-like appliance, including to the motor vehicle air conditioner or MVAC-like appliance from which the refrigerant was extracted. For equipment that only recovers refrigerant, properly using includes the requirement to recycle the refrigerant on-site or send the refrigerant off-site for reclamation.
- (2) Refrigerant from reclamation facilities that is used for the purpose of recharging motor vehicle air conditioners must be at or above the standard of purity developed by the Air-conditioning and Refrigeration Institute (ARI 700-93) (which is codified at 40 CFR part 82, subpart F, appendix A, and is available at 4301 North Fairfax Drive, Suite 425, Arlington, Virginia 22203). Refrigerant may be recycled offsite only if the refrigerant is extracted using recover only equipment, and is subsequently recycled off-site by equipment owned by the person that owns both the recover only equipment and owns or operates the establishment at which the refrigerant was extracted. In any event, approved equipment must
